

Wink to Webster Joint Venture Announces Addition of MPLX, Delek US and Rattler Midstream as Partners

HOUSTON, August 5, 2019 – Wink to Webster Pipeline LLC today announced that affiliates of MPLX LP, Delek US and Rattler Midstream LP have joined ExxonMobil, Plains All American Pipeline and Lotus Midstream as partners in the joint venture to develop the Wink to Webster crude oil pipeline project (the “Project”).

The Project is expected to generate more than 3,100 construction jobs and will provide safe, reliable and cost-effective transport for Permian producers to market destinations in Texas.

The Wink to Webster pipeline is expected to provide more than one million BPD of Permian takeaway capacity utilizing domestically sourced 36-inch-diameter line pipe. The Project will have origin points in Wink and Midland and deliver to multiple locations in the Houston market, including Webster and Baytown, with connectivity to Texas City and Beaumont.

The Project is underpinned by a significant volume of long-term commitments, and project costs will be shared proportionately among the partners. The Project is expected to commence operations in early 2021.

The Wink to Webster pipeline will play a critical role in supporting growing production in one of the world’s most prolific crude oil basins. Priority will be placed on utilizing existing pipeline corridors and advanced construction techniques to help limit community and environmental impacts.

About ExxonMobil

ExxonMobil, the largest publicly traded international oil and gas company, uses technology and innovation to help meet the world’s growing energy needs. ExxonMobil holds an industry-

leading inventory of resources, is one of the largest refiners and marketers of petroleum products, and its chemical company is one of the largest in the world. For more information, visit www.exxonmobil.com or follow us on Twitter www.twitter.com/exxonmobil.

About Plains All American Pipeline

Plains All American Pipeline, L.P. (NYSE: PAA) is a publicly traded master limited partnership that owns and operates midstream energy infrastructure and provides logistics services for crude oil, NGLs and natural gas. PAA owns an extensive network of pipeline transportation, terminalling, storage, and gathering assets in key crude oil and NGL producing basins and transportation corridors and at major market hubs in the United States and Canada. On average, PAA handles more than 6 million barrels per day of crude oil and NGL in its Transportation segment. PAA is headquartered in Houston, Texas. More information is available at www.plainsallamerican.com.

About MPLX

MPLX (NYSE: MPLX) is a diversified, large-cap master limited partnership that owns and operates midstream energy infrastructure and logistics assets, and provides fuels distribution services. MPLX's assets include a network of crude oil and refined product pipelines; an inland marine business; light-product terminals; storage caverns; refinery tanks, docks, loading racks, and associated piping; and crude and light-product marine terminals. The company also owns crude oil and natural gas gathering systems and pipelines as well as natural gas and NGL processing and fractionation facilities in key U.S. supply basins. More information is available at www.MPLX.com.

About Delek US Holdings, Inc.

Delek US Holdings, Inc. (NYSE: DK) is a diversified downstream energy company with assets in petroleum refining, logistics, asphalt, renewable fuels and convenience store retailing. The refining assets consist of refineries operated in Tyler and Big Spring, Texas, El Dorado, Arkansas and Krotz Springs, Louisiana with a combined nameplate crude throughput capacity of 302,000 barrels per day. The logistics operations consist of Delek Logistics Partners, LP (NYSE: DKL). Delek US Holdings, Inc. and its affiliates also own approximately 63 percent (including the 2

percent general partner interest) of Delek Logistics Partners, LP. The convenience store retail business is the largest 7-Eleven licensee in the United States and operates approximately 260 convenience stores in central and west Texas and New Mexico.

About Lotus Midstream

Based in Sugar Land, Texas, Lotus Midstream is an independent energy company focused on the development of midstream infrastructure and services necessary to transport crude oil and condensate from the wellhead to market. Lotus owns the Centurion Pipeline System, a large-scale, integrated network of approximately 3,000 miles of crude oil gathering and transportation pipelines that extends from southeast New Mexico across the Permian Basin of West Texas to Cushing, Oklahoma. Lotus Midstream is backed by EnCap Flatrock Midstream. For more information please visit www.lotusmidstream.com.

About Rattler Midstream LP

Rattler Midstream LP (NASDAQ: RTLR) is a growth-oriented Delaware limited partnership formed in July 2018 by Diamondback Energy, Inc. (NASDAQ: FANG) to own, operate, develop and acquire midstream infrastructure assets in the Midland and Delaware Basins of the Permian Basin. Rattler provides crude oil, natural gas and water-related midstream services (including fresh water sourcing and transportation and saltwater gathering and disposal) to Diamondback under long-term, fixed-fee contracts. For more information, please visit www.rattlermidstream.com.

Forward-Looking Statements

This press release contains forward-looking statements within the meaning of the federal securities laws. These forward-looking statements relate to, among other things, statements with respect to forecasts regarding capacity and timing for becoming operational for the opportunities discussed above. You can identify forward-looking statements by words such as "anticipate," "believe," "design," "estimate," "expect," "forecast," "intend," "plan," "project," "potential," "could," "may," "should," "would," "will" or other similar expressions that convey the uncertainty of future events or outcomes. Such forward-looking statements are not guarantees of future performance and are subject to risks, uncertainties and other factors, some of which are beyond the companies' control and are difficult to predict. Although

management of ExxonMobil, Plains All American Pipeline, MPLX, Delek US, Lotus Midstream and Rattler Midstream (the "companies") believe any such statements are based on reasonable assumptions, there is no assurance that actual outcomes will not be materially different. Among the key risk factors associated with the project that may have a direct impact on completion of the project and construction of the pipeline or the pipeline's and the companies' results of operations and financial condition are: (1) the ability to obtain all required rights-of-way, permits and other approvals on a timely basis; (2) the ability to complete construction of the project on time and at expected costs; (3) price fluctuations and overall demand for crude oil; (4) changes in the pipeline's tariff rates or other terms as required by state or federal regulatory authorities; (5) the occurrence of an operational hazard or unforeseen interruption; (6) disruption in the debt and equity markets that negatively impacts the companies' abilities to finance capital spending (7) completion of pipeline capacity by others and (8) willingness to incur or failure of customers or vendors to meet or continue contractual obligations related to the project. Additional information about issues that could lead to material changes in performance is contained in filings with the Securities and Exchange Commission and can be found on the companies' respective websites and at www.sec.gov. The companies undertake no obligation to revise these forward-looking statements to reflect events or circumstances occurring after today's date.
