Startup Midland-to-Houston Segment**

Pipeline Begins Transport of Permian Crude to the U.S. Gulf Coast

HOUSTON, October 15, 2020 – Wink to Webster Pipeline LLC and an affiliate of Enterprise Products Partners L.P., owners of the Wink to Webster pipeline, announced the main segment of the pipeline system has started transporting Permian crude and condensate from Midland, Texas to Houston. This segment, constructed by the Enterprise affiliate, is being operated by ExxonMobil Pipeline Company.

The 650-mile Wink to Webster Pipeline system, built of 36-inch, U.S.-made pipe, is designed to transport approximately 1.5 million barrels per day of crude and condensate. Underpinned by a significant volume of long-term commitments, the pipeline system will have origin points in Wink and Midland, Texas, multiple destinations in the Houston market, including Webster, Baytown and the Enterprise Crude Houston terminal, and connectivity to Texas City and Beaumont.

Wink to Webster Pipeline LLC is a joint venture consisting of affiliates of ExxonMobil, Plains All American Pipeline, Lotus Midstream, Delek US, MPLX LP, and Rattler Midstream LP.

Forward-Looking Statements

This press release contains forward-looking statements within the meaning of the federal securities laws. These forward-looking statements relate to, among other things, statements with respect to forecasts regarding capacity and timing for becoming operational for the opportunities discussed above. You can identify forward-looking statements by words such as "anticipate," "believe," "design," "estimate," "expect," "forecast," "intend," "plan," "project," "potential," "could," "may," "should," "would," "will" or other similar expressions that convey the uncertainty of future events or outcomes. Such forward-looking statements are not guarantees of future performance and are subject to risks, uncertainties and other factors, some of which are beyond the companies' control and are difficult to predict. Although management of ExxonMobil, Plains All American Pipeline, MPLX, Delek US, Lotus Midstream, Rattler Midstream, and Enterprise Products Partners L.P. (the "companies") believe any such statements are based on reasonable assumptions, there is no assurance that actual outcomes will not be materially different. Among the key risk factors associated with the project that may have a direct

impact on completion of the project and construction of the pipeline or the pipeline's and the companies' results of operations and financial condition are: (1) the ability to obtain all required rights-of-way, permits and other approvals on a timely basis; (2) the ability to complete construction of the project on time and at expected costs; (3) price fluctuations and overall demand for crude oil; (4) changes in the pipeline's tariff rates or other terms as required by state or federal regulatory authorities; (5) the occurrence of an operational hazard or unforeseen interruption; (6) disruption in the debt and equity markets that negatively impacts the companies' abilities to finance capital spending (7) completion of pipeline capacity by others and (8) willingness to incur or failure of customers or vendors to meet or continue contractual obligations related to the project. Additional information about issues that could lead to material changes in performance is contained in filings with the Securities and Exchange Commission and can be found on the companies' respective websites and at www.sec.gov. The companies undertake no obligation to revise these forward-looking statements to reflect events or circumstances occurring after today's date.
